

# SOLBERG RESIDENCE

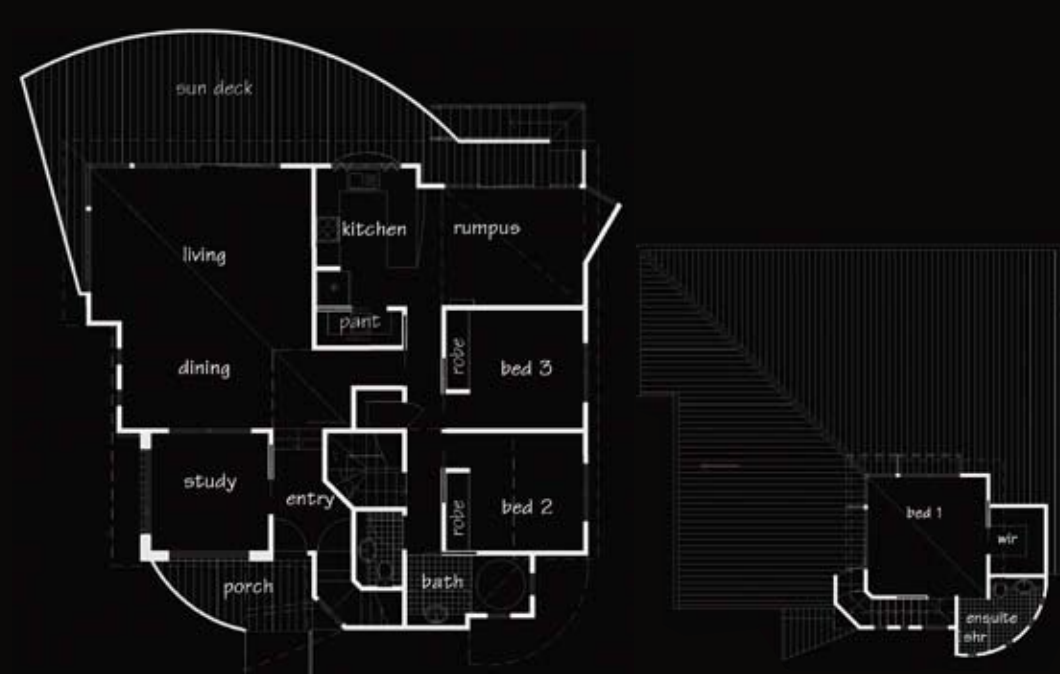

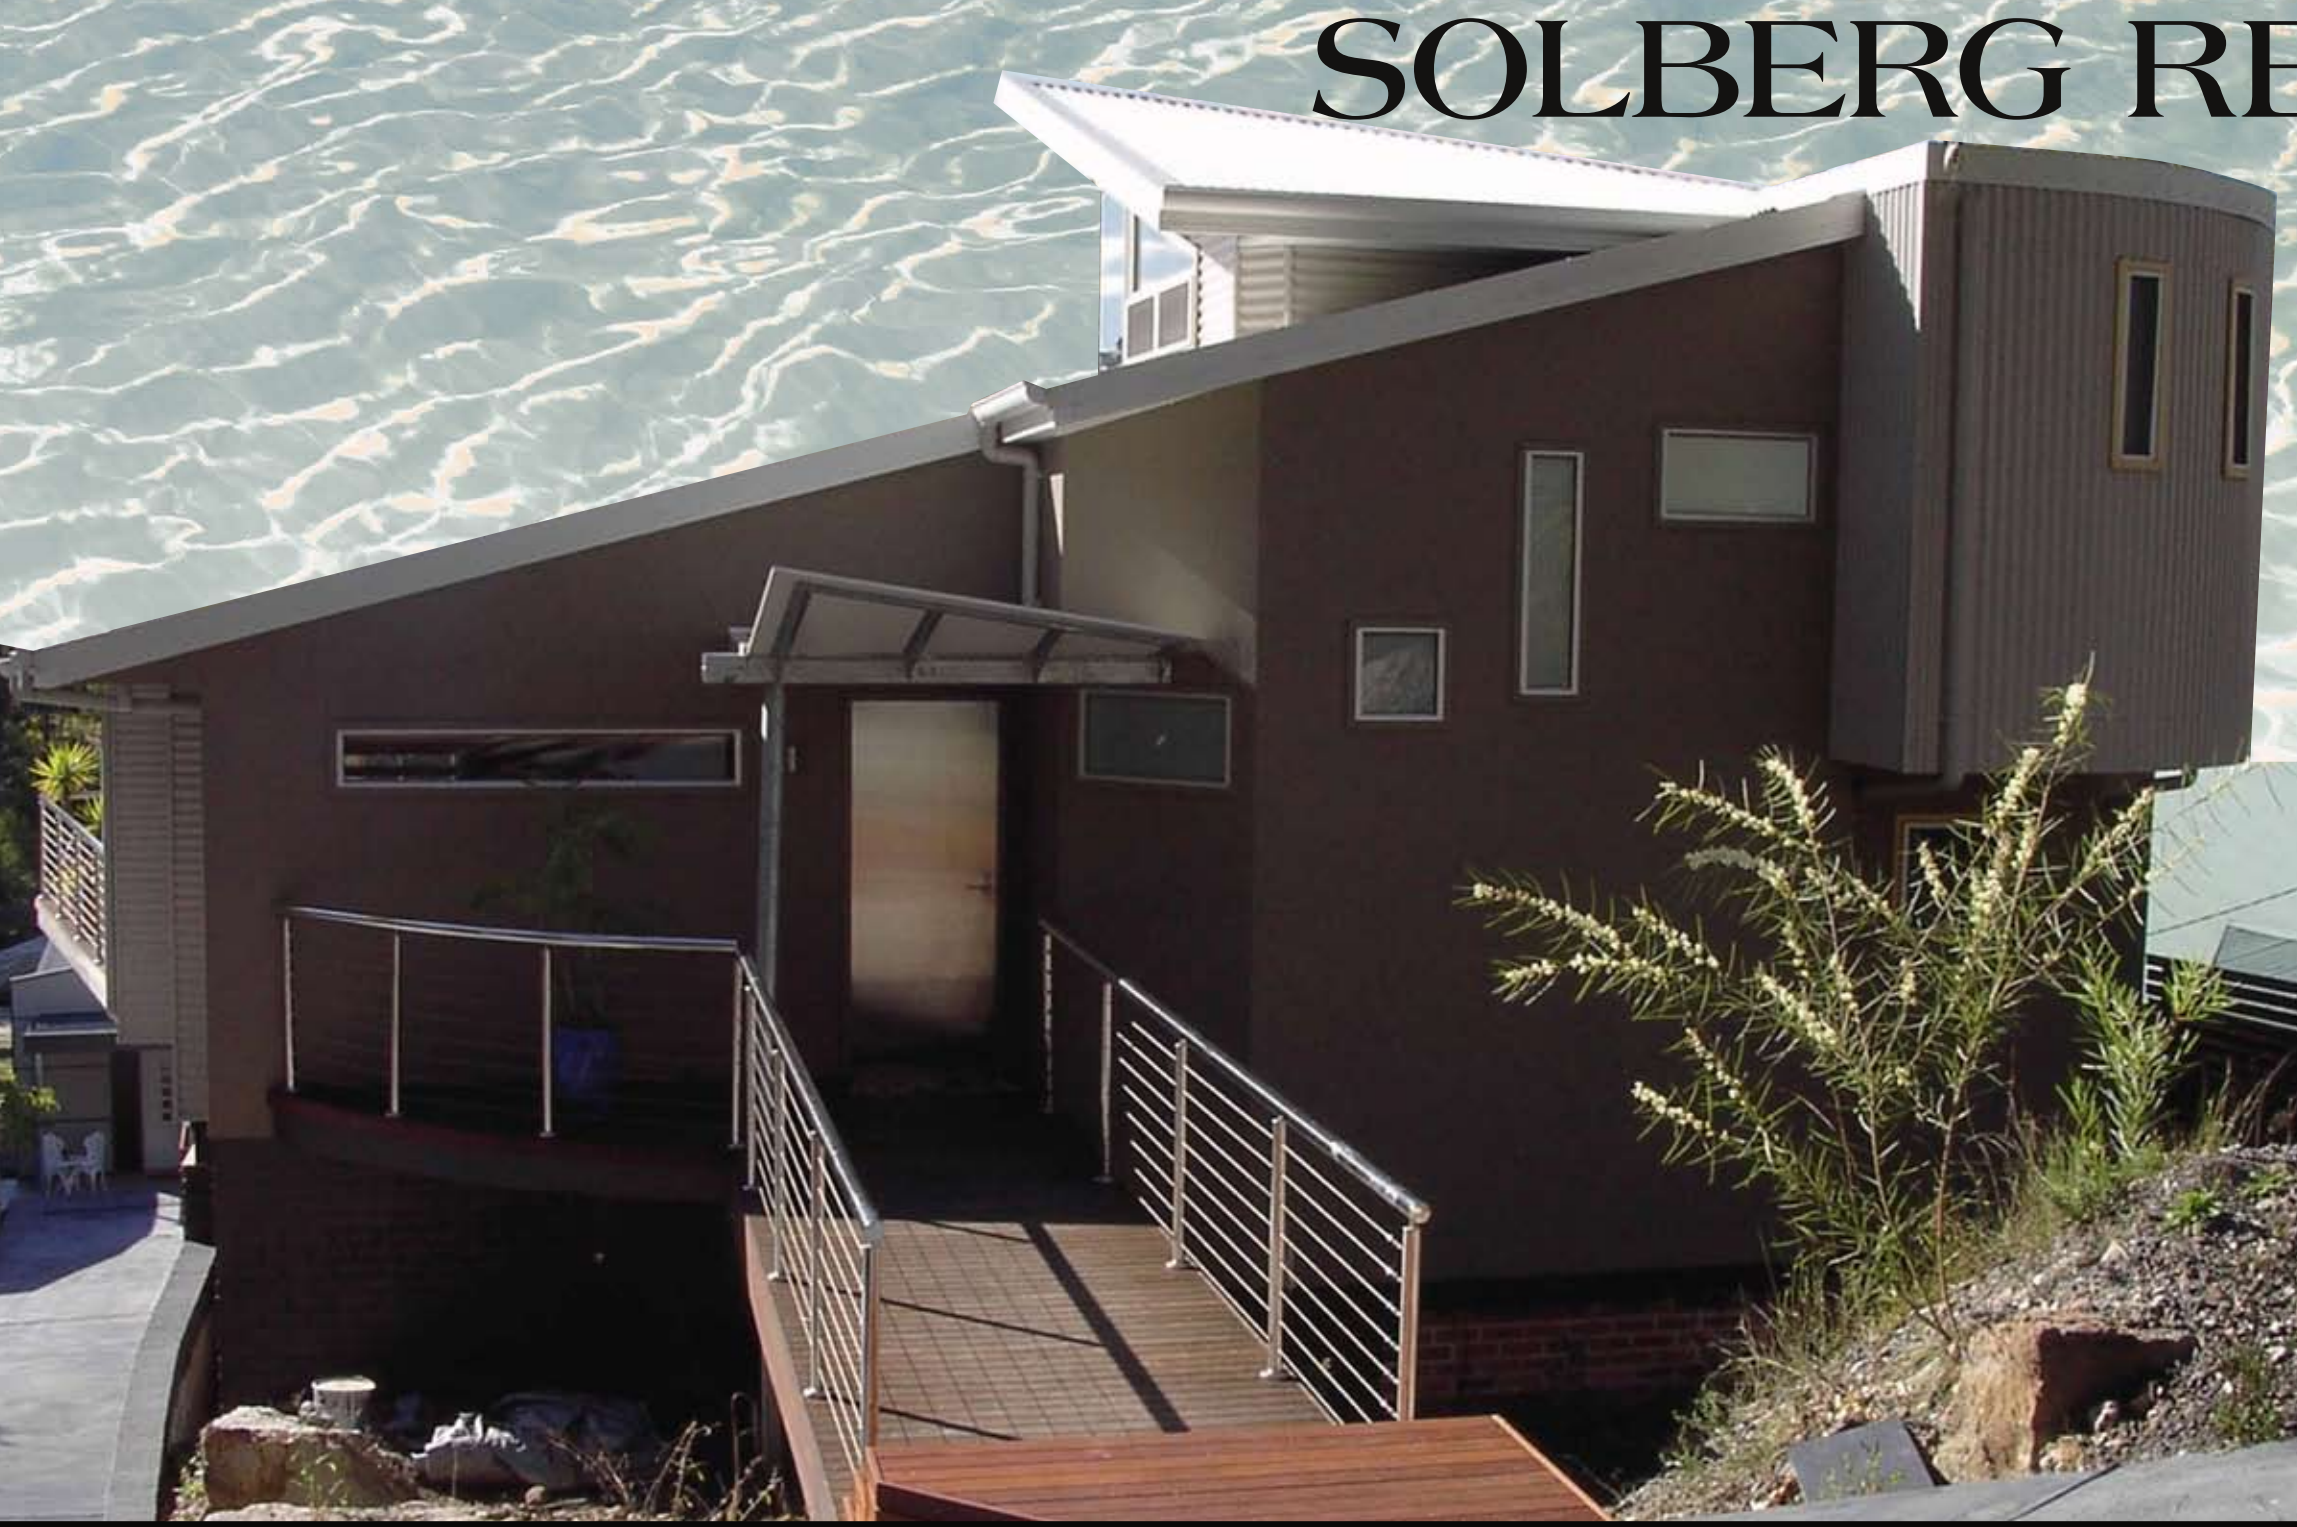

## Jervis Bay

Architects Statement - Over \$300,000 + Energy Efficient

Craig and Kylie had lived in other homes and realised something was missing – Spatial Planning.

During our discussions, we focused on designing for their Lifestyle, spatially zoning the family living areas, maximising the opportunities of the steeply sloping site, connecting with the outdoors + a spacious cantilever balcony. Also Passive Solar Design – 5 Star principles, ensuring privacy from neighbours.

The design by PRM has met all their expectations and created a unique building which is adaptable to their family lifestyle and connected with the Jervis Bay environment
